

Accepted Oral Papers

Abstract ID	Title	Author
OP-01	A comparative study of optical microscopy and automated cell analyzers: an analysis of fifty different body fluid samples.	Misha Suman
OP-02	Diagnostic utility of liquid based cytology, cell block and anti - epithelial cell adhesion molecule immunostains in suspected malignant pleural effusions	Nitika Gupta
OP-03	Categorisation of salivary gland lesions using milan system: a review of 150 cases	Jasdeep Kaur Thiara
OP-04	Utility of crush smears for intraoperative diagnosis of central nervous system lesions	Manveen Kaur
OP-05	Comparison of manual liquid based cytology smear with conventional paper smear	Aarzu Chopra
OP-06	Comparison of conventional pap smear and liquid based cytology in screening of cervical cancer	Raj Aravind Kamatchi
OP-07	A comparative study of serous effusions by using routine staining methods and modified cell block technique- 1 yr study in a tertiary care centre	Rekha Rani
OP-08	Cytohological correlation of salivary glands fine needle aspiration (FNA) cytology with application of milan system for risk stratification-a cross sectional study	Romana Mubarak
OP-09	Automation vs manual technique: a comparative evaluation of ESR in multiple myeloma patients	Anugrah Joshi
OP-10	To evaluate the diagnostic and prognostic significance of coagulation markers in breast	Brijesh Kumar Tiwari

	cancer patients - a prospective study	
OP-11	Morphological spectrum of bone marrow findings in visceral leishmaniasis	Damleen Kaur
OP-12	Correlation of inflammatory parameters with severity of psoriasis in obese and non-obese patients.	Atmaja Anil Jadhav
OP-13	Exploring the spectrum of hemoglobinopathies in the paediatric population	Saumya Bindlish
OP-14	Spectrum of hemoglobinopathies diagnosed using HPLC in a tertiary care centre and their distribution in general population	Niharika Mahajan
OP-15	Frequency and outcome of 1p32 deletion in newly diagnosed multiple myeloma	Nithye Parvathy
OP-16	Prevalence of markers of Hepatitis C virus among voluntary blood donors in tertiary care hospital in punjab.	Aasheen Kaur
OP-17	Unleashing the immune warrior: tumor infiltrating lymphocytes as key predictors of lymph node status in head and neck cancer	Neha Yadav
OP-18	Histopathological study of intracholecystic papillary neoplasm (ICPN) of gall bladder in cholecystectomy specimens: a case series.	Prableen Kour
OP-19	Clinicopathological spectrum of mature T-cell lymphomas classified as per the latest WHO haem5. A single institute experience.	Mintu Ann Joy
OP-20	Clinicopathological study of mesenchymal hamartoma of liver	Shilpi
OP-21	Evaluation of stromal CD10 expression in breast carcinoma and its correlation with	Sunidhi Sharma

	clinicopathological features	
OP-22	Fungal rhinosinusitis: unravelling the disease spectrum	Puneet Kaur
OP-23	Clinicopathological spectrum of cutaneous lichen planus: a 2-year retrospective study	Manoj Kumbhare
OP-24	Inkborne tuberculosis- a case series	Jyoti Dhawan
OP-25	Carcinoma cervix and its HPV association by HPV-RNA In Situ hybridization and/or p16 immunohistochemistry	Vasudha Sharma
OP-26	Comprehensive histopathologic and immunohistochemical analysis of perivascular epithelioid cell tumors of the female genital tract	Payal Charaya
OP-27	Clinical and pathological characteristics of serous cystic neoplasm of the pancreas	Aayushi Singh
OP-28	Caught congo red-handed: GIT amyloidosis be on watch out	Anjali Gupta
OP-29	Spectrum of neuro-oncology cases in rural india: experience from a tertiary care oncology centre with emphasis on discordance and concordance	Komal Baghla
OP-30	Clinical implications of receptor discordance in metastatic breast carcinoma: insights from a 5-year single-centre study	Rasheeda
OP-31	Histopathological analysis of skin adnexal tumors: a three year study of 75 cases at a tertiary care center	Ruchira Palmal
OP-32	Invasive breast carcinoma with squamous differentiation a case series	Navneet Kaur Bajwa
